

# Research. Education. Advocacy. Mentoring.

## Association for Clinical and Translational Science

### Who We Are

The **Association for Clinical and Translational Science (ACTS)** is the conduit for networking, development, and discussion in the field of translational sciences. We bring together scientific leaders and encourage multidisciplinary teams of investigators and professionals from related fields. We also support our future leaders by developing knowledge and skills and providing opportunities for career growth.

### Mission & Goals

Our mission is to advance research and education in clinical and translational science so as to improve human health.

### Membership Info

Ready to partner with like-minded institutions and join in our common cause to advance clinical and translational science? ACTS members enjoy:

- Complimentary subscription to the *ACTS Connection*, our bi-weekly e-newsletter with breaking translational science news, membership news, advocacy updates, and grant opportunities
- Registration discounts for the annual Translational Science Meeting and subscription discounts for *The Journal of Translational Science* through Cambridge University Press
- Advocacy representation with government officials
- Access to an unrivaled network of leading minds in clinical and translational science
- Enhanced opportunities for training in clinical and translational science
- New ways to further the field by volunteering with an ACTS committee

### Annual Membership

Advance your career by joining the Association for Clinical and Translational Science, and connect with a vibrant community of over 6,000 individuals from 58 institutions. Join today at the individual rate of \$200 (\$50 for trainees), or contact us at [info@actscience.org](mailto:info@actscience.org) to learn how you and your colleagues can join together and receive an Institutional Membership.
