Have you checked out our brand new resource yet? We recently launched the brand new [ACTS Career Center](#)!

This page allows both members and non-members to view relevant job postings and apply for them through our secure page. Use code **ACTSMEMBER** to receive your 50% discount.

Journal of Clinical and Translational Science

[Volume 1 / Issue 5, December 2017](#) of the Journal of Clinical and Translational Science is available for viewing!

JCTS's mission is to provide a forum for the rapid communication of topics of interest and relevance to the large and diverse community of clinical and translational scientists with the goal of improving the efficiency with which health needs inform research and new diagnostics, therapies, and preventive measures reach the public. The Association for Clinical and Translational Science has partnered with the American Physician Scientists Association (APSA) and the Clinical Research Forum (CRF) to support the growth and development of JCTS.

News From the Hill: June 15, 2018

Recently, a key priority for legislators from both sides of the aisle has been advancing the annual appropriations bills. Most notably, the House Labor-Health and Human Services-Education (L-HHS) Appropriations Subcommittee held a markup of its Fiscal Year (FY) 2019 spending bill. Specific funding information will not be available until the full Appropriations Committee considers the House FY 2019 L-HHS Appropriations Bill and the committee report accompanying the measure is available. Further, a fuller picture of likely funding scenarios for clinical and translational research as well as research training and career development opportunities will emerge when the Senate advances its L-HHS bill later this year.

Of particular interest, the FY 2019 House L-HHS Appropriations Bill proposes:

- \$38.3 billion for the National Institutes of Health, an increase of \$1.25 billion over FY 2018
- \$542.77 million for the Clinical and Translational Science Awards Program, level-funded from FY 2018.
- “Up to” \$30 million for the Cures Acceleration Network, an increase of roughly \$5 million over FY 2018.
- \$366 million for the Institutional Development Awards Program, an increase of \$15 million over FY 2018.
- \$7.6 billion for the Centers for Disease Control & Prevention, a programmatic increase of \$427 million above FY 2018
- \$6.5 billion for the Health Resources & Services Administration, a cut of \$196 million below FY 2018
- \$5.6 billion for the Substance Abuse and Mental Health Services Administration, an increase of \$448 million above FY 2018
- \$334 million for the Agency for Healthcare Research and Quality, level-funded from FY 2018
