Join the ACTS Leadership Circle

The ACTS Leadership Circle recognizes academic institutions that wish to provide an additional investment to support the future of Translational Science. Our shared goal of advancing research and education in clinical and translational science is pivotal in improving individual and population health. With the support of Leadership Circle members, we can enhance Translational Science programming and offer the highest quality opportunities for researchers at every career stage to learn about tomorrow's research today.

News From the Hill

News From the Hill: January 18, 2019

The 116th Congress is only a couple weeks old, but the partial government shutdown stretches back into last year. While federal medical research and public health programs are not directly impacted (the FY 2019 appropriations bills for HHS, DoD, and VA were completed), the disruption is resonating across the government. The Food and Drug Administration is operating with only “essential” staff, which is limiting food safety and drug development/oversight activities.

Further, the Government Printing Office is closed, which is preventing the official publication of Federal Register notices announcing proposed health policy rules and the announcement of advisory council and similar committee meetings. In aggregate, the shutdown is causing compounding commotion across the public service as it drags on as well as a palpable tension stemming from the uncertainty moving forward. Stakeholder organizations have begun highlighting emerging challenges while calling on both congressional leaders and the administration to end the shutdown.
